

CASE STUDY:

Walmart

Remodel

PROJECT PARTNERS: Leading Construction Firm

BUILDING USE: Tulsa, OK Walmart Remodel, 1 - 20' Office, 1 - 20' Elite Office with Restroom, 13 - 20' Storage Containers

The Challenge

The remodel at the Tulsa, OK Neighborhood Walmart site was met with significant logistical hurdles. The location offered limited space for parking and restricted access for construction equipment, making the placement of construction containers and the on-site office a daunting task. Additionally, the project was bound by a stringent timeline; the duration for construction was limited, necessitating rapid deployment and equally swift removal once the work was completed. These conditions required a solution that could be delivered quickly without sacrificing functionality or quality.

The Solution

To address these challenges, the construction firm adopted Mobile Modular Portable Storage solutions. Capitalizing on the proximity of their yard, the team was able to deliver a 20' Office, a 20' Office with Restroom, and 13 standard 20' storage containers in just two days. The modular units were strategically positioned to make the most of the available space, ensuring that both the office and storage containers were exactly where they needed to be. This agile approach allowed the project team to maintain operational efficiency despite the site's limitations.

Key Benefits

- **Rapid Deployment:** The two-day delivery minimized downtime, allowing work to commence promptly.
- **Utilization of Space:** Despite access restrictions, the modular units were placed precisely to enhance workflow.
- **Flexibility:** The modular approach offered versatility, enabling quick adaptation to the site's requirements.
- **Cost & Time Efficiency:** Accelerated delivery & pickup contributed to reducing the overall project time & expenses.
