

# Guide to Preparing for the Installation of a Restroom in a Portable Storage Elite Office Container

## Step 1: Site Preparation

- **Choose a Level Site:** Make sure the site for the container is flat, stable, and clear of debris and overhanging power lines.
- **Site Inspection:** Check that the site follows local building codes and regulations.
- **Utilities Access:** Ensure you have access to water, electricity, and sewage.

## Step 2: Delivery and Placement

- **Container Delivery:** Set up a delivery date and time with Mobile Modular Portable Storage.
- **Container Placement:** Our delivery specialist will position the container at your site.
- **Secure Positioning:** Make sure the container is securely in place.

## Step 3: Utility Connections

- **Water Supply:** Connect the container to a water source for the restroom.
- **Sewage System:** Connect the restroom to the existing sewage system or a septic tank.
- **Holding Tank:** Have a licensed plumber hook up the holding tank.

## Step 4: Purging Your System

- Water Supply: Shut off the water supply at its source.
- Water Faucet(s): Open all water faucets.
- Toilet: Flush the toilet.

## Frequently Asked Questions

### Q: Can I connect to city water?

Yes, you can connect to city water. Be sure to purge the line before connecting to remove any sediment. Additionally, remember to purge the line again before returning the container.

### Q: Do you provide holding tanks?

While we do not directly provide holding tanks, we can certainly assist you in obtaining one. Our team will work with you to identify your specific needs and connect you with a reliable supplier to ensure you have the appropriate holding tank for your setup.

### Q: What connections do I need?

Use a 1/2" CPVC male threaded supply and a 1-1/2" PVC female threaded waste connection.

### Q: Who hooks up the holding tank?

A licensed plumber must hook up the holding tank to ensure proper and safe installation.
